- Short history of UVT

  The University was founded by the decree law no. 660 issued on 30 December 1944, which stipulates that a university must be created in western Romania. Its first faculties either were dissolved or became independent institutions. These independent higher education institutions became a sole university at the end of September 1962. That is why October the 1st is mentioned in the University Charter as University Day; it is not only the day when the academic year begins but also the day when the difficult process which had started on 30 December 1944 ended, when the efforts of creating the university were crowned with success.

  By 1968, our institution had become an independent university, with a prestigious academic staff in all traditional fields; this was the ideal for which many leading Romanian intellectuals, especially those from the Banat region, had fought. Unfortunately, there followed a difficult period for Humanities and Exact Sciences. Fields of study such as Music, Fine arts, History, Geography, Biology, and Chemistry disappeared one by one; Philology was considerably reduced. As a result, many of the faculties were transferred to other institutions.

  1989, the year of the Romanian revolution, was a turning point in the evolution of our university. It led to the present-day conditions. That is why the current structures and achievements make Universitatea de Vest din Timișoara a trusted partner.

  An essential mentality change took place in the perception of the academic institution, in accordance with the democratic institutions in Western Europe. A substantial institutional reform was carried out, beginning with the redefining of the university’s mission by establishing its objectives.

  International par excellence, Universitatea de Vest din Timișoara has partnerships with over 100 universities worldwide. Student mobility is the foremost issue of these partnerships.

**Medical insurance**

You should apply for a European Health Insurance Card. This card allows you to enjoy all the necessary medical assistance during your temporary stay in any EU country. The card allows you access to medical services in the public system in the majority of cases and you will be treated as an “insured” person, living in the country you are visiting. We also encourage you to purchase an additional insurance for students. It will cover other cases of emergency that your national insurance may not cover (e.g. medical transport back home).

**ERASMUS STUDENT NETWORK TIMIȘOARA**

- **What is ESN?**

  ESN – Erasmus Student Network is one of the biggest student associations in Europe, present in more than 390 universities in 36 countries, which acts in the interest of international students. ESN’s aim is to enhance the practical and social integration of the international students and to represent their rights and needs on a local, national and international level. ESN also promotes study abroad opportunities and takes care of the reintegration of the students who return to their home country after an educational experience aboard.

- **What is ESN Timişoara?**

  ESN Timişoara is a section of Erasmus Student Network in charge of the Erasmus and international students in the city of Timişoara. The section got recognised by ESN Romania on national level in December 2011 and on an international level by ESN International in January 2012. The activity of the section is currently developed by its 15 active members who work on a volunteering basis. The members of ESN Timişoara do not have any financial benefits out of their activity in the section and do this job out of the pleasure of helping the international students and contributing to an intercultural dialogue among these and the local community. The section’s main activities include offering practical information to the incoming Erasmus students, organising social activities, parties, trips and other events for the Erasmus students.

- **ESN Board & Buddy System**

  The board is the decision body of the ESN section, the one who leads the group of volunteers and manages the activity of the section. The ESN Timişoara board members take care of organizing activities for the international students in the city and for the ex-Erasmus Romanian students, their main aim being to contribute to the social (re)integration of the two groups.

  ESN Timişoara has a group of around 15 people active as a Buddy system. They are not part of ESN’s group of volunteers, but they are here to assist incoming students regarding their academic schedule, getting around the city or finding accommodation off campus.

The North Railway Station (Gara de Nord) is the main railway station of the city, located in the north-western part of the city, on Regele Ferdinand Boulevard, only 15 minutes away from the city centre.
